

Transportation Management

G&D Integrated offers turnkey transportation management services. Our innovative solutions, the result of more than a century of best practices, lower transportation costs, improve customer service and reduce cycle times. G&D can place staff at your site or manage your business from our Operations Center to deliver the optimal cost and service combination.

Experience the benefits of our JIT Expedited services:

Minimize costs in inventory and meet on-time delivery requirements

Reduce setup time and inventory

Improve the flow of materials, components and finished goods

Minimize waste by improving inefficiencies while remaining environmentally conscious

Consider G&D Integrated JIT Expedited services if you:

Have capacity constraints

Want to run a leaner inbound supply chain

Have customers driving JIT

Want to coordinate inventory shipments with transportation and warehousing activities

Want to keep inventory from breaking or expiring

Our transportation planning analysts utilize today's latest tools to identify routing synergies that create opportunities for lower cost and better service throughout our network. G&D's transportation management technology electronically monitors moves and makes shipment information available real-time through a web browser. Our skilled drivers are equipped with state-of-the-art equipment and technology to execute shipments flawlessly, meeting your most demanding logistics requirements.

JUST-IN-TIME EXPEDITED SERVICES

Leveraging our asset-based fleet, G&D Integrated can provide JIT delivery to your production floor. With more control of transportation options, we can work with our customers' specific production requirements to deliver the exact parts needed at the exact time and reduce time and handling within their facilities and on their assembly lines.

Helping you with your transportation needs is just the beginning at G&D Integrated. We offer a range of additional services that deliver value, address real supply chain issues and optimize your transportation processes.

YARD MANAGEMENT

G&D Integrated leverages expert project management teams to support the implementation of on-site yard management solutions. Our team of knowledgeable, trained employees will collaborate with you to streamline on-site transportation and yard management operations.

With the use of real-time logistics management software, you will have automated yard activity data which is enterprise-wide and gives you instant visibility to where your on-site freight is at all times.

JOCKEY SERVICES

In conjunction with our yard management, G&D Integrated offers full on-site jockey programs including personnel, equipment and execution accuracy metrics.

CONTAINER/DEPOT MANAGEMENT

G&D Integrated can provide high-quality inspection, lift and storage of TOFC and COFC containers. We have both long-term and short-term secured storage options for shipping containers.

Experience the benefits of our Yard Management services:

Better visibility to shipments in the yard results in maximum efficiencies

Improve fleet utilization

Optimize the flow of inbound and outbound goods

Consider G&D Integrated Yard Management services if you:

Are currently running an inefficient yard

Want instant visibility to where your on-site freight and containers are at all times

Are looking to improve load aggregation to optimize truck utilization
